Minimum System Requirements

Minimum System Requirements [1]

PO shall ensure that all computers and electronic devices owned or leased by PO or any PO Participant to be used in connection with the HIN Services are properly configured, including the base workstation operating system, web browser, and Internet connectivity and can securely support transport via either:

> *(a) an IPsec Virtual Private Network or;*
> *(b) Direct Secure Messaging using a Direct HISP that has been accredited by EHNAC DTAAP ("DirectTrust") or, with the written permission of HIN, that the Direct operator is a member of the NATE Blue Button For Consumers (NBB4C) trust bundle;*
> *(c) Secure REST/Restful APIs or;*
> *(d) NwHIN protocols such as XCA;*

(e) Other forms of transport capable of secure transmission of PHI as mutually agreed; Additional minimum system requirements, if any, shall be made available at: http://mihin.org by the Effective Date of this Agreement.

---

[1] These Minimum System Requirements shall apply to all data sharing agreements for Michigan Health Information Network Shared Services, Velatura Services LLC, Velatura HIE Corporation and Midwest Health Connect.
